Woodstone & Hard Plastic

Woodstone Desktops are 10% lighter and 18% more affordable than hard plastic, with superior durability. Made from wood fibers and melamine resin, they exceed ANSI/BIFMA standards in five rigorous tests.

Hard Plastic desktops are durable, heavy-duty, and virtually maintenance-free. Made from compressed hardwood, pigment, and melamine resin, they offer a classic, time-tested design for schools.

High Pressure Laminate Edge and Finish Options

T-MOLD STANDARD
Hydraulically inserted PVC T-Mold edge banding 1/8" thick, bull-nose profile and smooth matte finish.

T-Mold*
(Shown in Primary Red)

X-STRONG OPTIONAL
Sprayed on polyurea, a tough and waterproof textured Epoxy paint, bonded directly onto the table edge, finished with a high lacquer coating.

X-Strong*
(Shown in Tangerine)

PVC 3MM OPTIONAL
3mm thick PVC material applied with heat activated durable adhesive, in a smooth flat matte finish.

PVC 3mm*
(Shown in Aqua)

Watch Demo

*Edge Finishes are available in standard Black and Light Gray, and in all Educational Edge colors
